## DETAILED ACTION

### *Election/Restrictions*

Applicant's election with traverse of Group I in Paper No. 11 is acknowledged. The traversal is on the ground(s) that the Groups contain a Special technical feature. This is not found persuasive because 1) all of the claims do not contain an active agent containing 70% monoterpenes: for example, claim 2 recites wherein the active ingredient contains 60% limonene which is not a monoterpene with 3 unsaturations. Further, the salts as found in claim 1 are not found in some of the dependant claims, because some of the dependant claims recite carnallite. Carnallite is a specific formation of salt,  $\text{KMgCl}_3 \cdot 6\text{H}_2\text{O}$  which does not 'include' the salts of claim 1. Thus, the Special Technical feature lacking in the claims here is two-fold.

The requirement is still deemed proper and is therefore made FINAL.

Upon further consideration, it is deemed that an election of species with regard to the elected Group of Claims 1-15 is in order:

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Art Unit: 1654

The species are as follows:

**active ingredient:** Please select *one* active ingredient for examination on the merits. For example, an active ingredient comprising 70% monoterpenes with three unsaturations, a single type of extract (i.e., an aromatic oil from a particular species of fruit), the type of oil (aromatic or ether), an active ingredient comprising 60% of limonene, or a particular mixture such as myrcene and limonene for example.

**salt:** Please elect one type of salt or one combination, i.e., NaCl or NaCl + MgCl<sub>2</sub>.

Applicant is required, in reply to this action, to elect a single species of active ingredient and salt to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1654

The claims are deemed to correspond to the species listed above in the following manner:

The following claim(s) are generic: 1-15.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: As indicated *supra*, the 'active ingredient' is not consistent throughout the claims. In the broad claim, Applicant claims a composition comprising an active ingredient comprising at least 70% by weight monoterpenes with three unsaturations, while other claims recite an active ingredient which contains 60% limonene (does not contain three unsaturations). Further, some dependant claims are drawn to 'wherein said salt is included in the form of carnallite. An embodiment of the special technical feature is the presence of a salt selected from magnesium bromide, sodium chloride, magnesium chloride, calcium chloride and mixtures thereof. The recitation of 'carnallite' in some of the dependant claims creates lack of consistency with regard to the 'Special Technical feature' (please also see explanation *supra*).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
